

# ISM Lab06 group 2

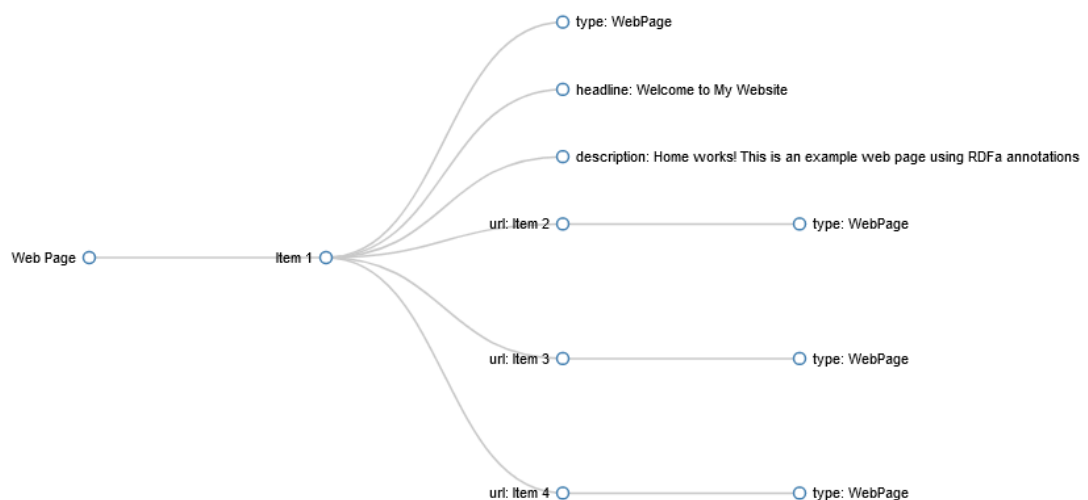

## 1. Description:

- **RDFa Annotations:** Added RDFa annotations to Angular component templates to provide semantic information about the content, including navigation buttons.
- **JSON-LD Script:** Dynamically inserted JSON-LD script into the head section of the HTML document using Angular's Renderer2.
- **Vocabulary:** Used schema.org vocabulary to define types and properties.

## 2. Screenshots:

- Screenshot of RDFa Play results.

```
<div vocab="http://schema.org/" typeof="WebPage">
  <header>
    <h1 property="headline">Welcome to My Website</h1>
    <p property="description">Home works! This is an example web page using RDFa annotations</p>
  </header>
  <main>
    <nav>
      <button routerLink="/event-list" property="url" typeof="WebPage">Event List</button>
      <button routerLink="/register" property="url" typeof="WebPage">Registration</button>
      <button routerLink="/login" property="url" typeof="WebPage">Login</button>
    </nav>
  </main>
</div>
```

- Screenshot of Google Structured Data Testing Tool results.
